SUMMARY

Professional and dedicated, recent graduated from Code Institute Napier University in **Full Stack Web Developer**. I describe myself as a quick learner which makes me able to adapt and thrive in new environments quickly. I am looking for an entry-level position job as a junior software developer.

SKILLS

- Html – CSS – Sass - Bootstrap - Materialize
- JavaScript - jQuery
- Python – Django - Flask
- MongoDB - MSQl - PostgreSQL
- Amazon Web Services – S3Bucket – Clould9 - Heroku
- WordPress – SEO
- Adobe Photoshop – Figma
- Git - CLI - GitHub

EDUCATION

Code Institute - Edinburgh Napier University, 2019

Full-Stack Software Developer:

- Covers HTML, CSS, Python, Django, JavaScript, and competencies such as agile development and project management.

Centro Universitario da Grande Dourados, Mato Grosso do Sul - Brazil, 2018

Bachelor of Technology - BTech: System Analysis and Development

- Covers analysis, design, systems implementation, database management, computer networks and operating systems, aiming to train graduates to work in the development and maintenance of computer systems.

EXPERIENCE

FREELANCE, 07/2020 - Current

Freelance Web Developer, London

- Translated concepts into wireframes, mock-ups to promote positive intuitive designs, site interactions and user experiences.
- Directed design projects accordingly to the customer budget and requirements, writing and production of page content to fulfil project demands and satisfy customer needs.
- Created landing pages, web applications using programming languages such as Python and JavaScript, Django framework and MongoDB.

Among the developed freelance websites projects using the program languages and framework above mentioned are:

- **Caly-Hair**

A project created for a hair stylist built with Python and Django. MongoDB was used to create the database for the price list. JavaScript was used for the contact form validation, email backend, photo gallery & navigation menu.

- **Ftt-lifestyle**

A project created for a holistic & health coach. JavaScript was used for contact form validation and email backend with email.js.

- **Rock Paper Scissor Game**

A project developed with a small group of fellow students on our monthly meet-up to improve our skills working as a team and with the Agile development, utilizing VSCode, SourceTree and GitHub to organise separate branches and managed pull requests. We have used JavaScript, session Storage and CSS Grid System.

WORK EXPERIENCE

BICYCLE TRADER, 01/2010 - 2020

Owner - Self Employed, London

- Created and developed my own on-line bicycle trader workshop, where I've been successfully active in the business for over 10 years.
- Increased client base by developing strong relationships with customers through efficient and helpful service.
- Independently conducted repairs and replacements to damaged or worn components, such as brakes, wheels, seats pedals etc.

BARTENDER, 09/2019 - Current

Greene King, London, London

- Prepared mixed drinks and poured wine, beer and non-alcoholic beverages for an average of 300 patrons per shift.
- Worked closely with the General Manager on health and safety standards, maintaining safe environment for customers and staff.
